## JUNOLINEA

Product Code: 62550 Sports Facilities

**JUNO**

### DESCRIPTION

Waterbased line marking paint producing producing exceptionally bright, weather resistant, durable lines. Formulated with acrylic copolymers of high strength and durability. Formulated to offer a combination of superb brightness with excellent longevity for stadium quality line marking.

### USE: INTERIOR - EXTERIOR

Recommended for marking sports facilities on sand and natural/synthetic turf, (soccerfields, farmland, natural fields, parks, sports facilities etc).

Popular with professional stadiums which require bright strong lines.

### PROPERTIES

- Esthetical and professional finish
- High visibility and bright finish
- Solid adherence to grass
- Does not deteriorate or attack applied surface material
- High coverage rating and opacity
- Elevated abrasion resistance, and very scratch and impact resistant.
- Excellent hardness
- Resistant to harmful weathering effects
- Quick Drying

**Finish:** Matt

**Color:** White

**Viscosity:** Minimum 100 P S/FR1007

**Density:** 1,65 ± 0,05 g/cc S/FR1001

**Drying:** Touch dry in 30 min

**Min. Repaint time:** 24 hours

**Max. Repaint time:** Unlimited

**Diluent:** Water

**Performance:** 60 m (lineal) / litre (Substrate dependant)

**Flash Point:** Not flammable

**VOC Content:** Below 30 g/l

62550 WHITE

**Format:** 10 L

## JUNOLINEA

Product Code: 62550 Sports Facilities

### APPLICATION TIPS

Stir content well until complete homogenisation.  
Apply on completely dry surface. Dilution depending on surface state and application tools used.

**ENVIRONMENTAL CONDITIONS.** Do not apply on substrates with temperatures below 5°C, nor on heated surfaces. Substrate temperature must be at least 3 °C above flash point. Relative humidity should be below 80%. Do not apply when risk of rain and high winds.

**DILUTION.** Dilution is done at time of application. Dilution ratios can be varied according to ground and weather conditions as well as type of line-marking machine or application equipment. For roller application dilution is up to 10%, and up to 20-30% for spray application.

**APPLICATION METHOD.** Brush, roller or line-marking equipment (spray).

**CLEANING.** Clean stains and application tools immediately after use with soapy water.

### SAFETY AND ENVIRONMENTAL INFORMATION

- Minimize product waste by estimating the correct amount needed, taking into account the m<sup>2</sup>, porosity and texture of the substrate.
- Replace lid firmly, and keep upright to avoid spills. Store surplus material in a ventilated, dry place. The container must be clean and of adequate size for the quantity of product left over.
- Preserve containers away from frost, high temperatures and direct exposure to the sun.
- Do not eat, drink or smoke while preparing and applying the product.
- Surface preparation and application operations must be carried out with appropriate safety and protective equipment.
- Keep out of reach of children • Dispose of contents/container to an authorized waste disposal site in accordance with local/national regulations.
- Ensure good ventilation during application and drying.
- Do not get in eyes, on skin, or on clothing • IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and possible to do. Continue rinsing. • IF ON SKIN: Wash with plenty of water. Do not use solvent thinners or White Spirit. • IF SWALLOWED: Call a doctor or hospital/poison centre if you feel unwell.

For more information consult product's Material Safety Data Sheet.
